

SMPog Lore

SMPog V1 (The Original):

One day Jamie (epic sith lord) decided to ask out local simp Bunniay to make a smp called SMPog. The rabbit, being a simp, agreed and began to make horrendous financial decisions, getting a 5gb ram plan for the server which we still have to this day. Many factions were formed. The Gay Clan, (Dione, Jamie, Alphataz, Tom). The others such as Bunniay lived behind the Mount Gay. This included Mruh, Cyp3er and some other irrelevant people I don't remember. Astromations and pringle lived on the country side East of Mount Gay. The 3 nations lived in harmony, until someone attacked. Soon after the organized assassination of Astromations by Ecur, SoMeOnE burned down Astro and Pringle's home. The mystery arsonist was never caught but this was the first act of violence ever committed on any smpog. This would cause Pringle to go live with Bunniay and Astro to go live alone 1k blocks out. A few days after this, Astromations came to lightly tap Ecur's shoulder, only to be ganged up on, have his sword stolen, and have his house burned down. Astro then decided that if he cant have a house, no one can. So then he committed mass arson. SMPog V1 died soon after.

SMPOG V2 (The Sequel)

After much nagging and likely many carrots Bunniay decided to restart SMPog. The new smpog seed sucked balls so everyone was separated. Dione founded the Poggins, a nation consisting of (Astro, Dione, James, Tom, Pringle, NabCab and Ecur (later abandoned Poggins)). With so much man power Poggins quickly became the most powerful nation. Not much happened until the idea of making a community shopping district was put into place. Many people began constructing their shops, only for the SMP to die before construction was complete. After Bunniay got sad due to [REDACTED] SMPog for suspended indefinitely.

SMPog V3 (The Failure)

Pringle and Astro decided to revive SMPog because bunniay broke both her legs after eating too many carrots. This new SMP was modded, however not many people joined cause Sumpoon won't download the damned mods. So anyway. It failed. We don't talk about it.

SMPog V4 (Terrorists, Terrorists and More Terrorists)

The main global power in SMPog V4 was Ghitalyland, a town funded and build by Astromaitons. A certain despised player called Steve250 grieved SMPog only for it to be quickly rebuilt and improved. Due to astro being so exceedingly cool, equr's faction (Donkey/Ass Town) decided to declare a battle. The battle of Ass Town then commenced, with Coolpringle and Astromation 2v6ing equrs faction because as astro said "A good king never seeks out war but most always be ready for it." Ghitalyland had won, with Equrs faction saddened. Bunniay had also returned but she decided to Xray because she doesn't know how to read rules. A couple days later, Eqr, Mruh, and Swub grieved New Ghitalyland, they were quickly banned and reprimanded, and the town was rebuilt with creative though many items were lost.

SMPog V5 (Pretty Good So Far)

SMPog V5 has been pretty chill so far. There have been no major acts of terrorism, everyone is stacked and logging on for vanity and Goodland is the global superpower, once again founded by astro (fucking legend). The only threats of war are a dog uprising by Amber and Fudge but that is unlikely cause they are so harmless.
